600 MHz Wireless Trade-in Overview

Over the next few years, the FCC's Incentive Auction will prohibit customers from operating wireless microphones in the 600 MHz frequency band. Your current wireless systems may be affected. If so - **Sennheiser will help you trade in your old 600 MHz gear towards new wireless! 600 MHz gear from any competitive manufacturer will be accepted!**

PROMOTIONAL PERIOD

Sennheiser's 600 MHz program runs from July 1, 2019 through July 13, 2020.

STEP 1: Check if your current wireless will be affected

Wireless mics and monitoring systems are currently allowed to operate from 470 - 698 MHz. By July 13, 2020, the FCC will limit operation to 470 - 608 MHz. While the majority of wireless systems in use today will be unaffected, customers with systems that operate above 608 MHz will unfortunately need to discontinue use and migrate to new frequency ranges.

To check if your current wireless will be affected, look for a printed sticker on your equipment indicating its frequency range. On Sennheiser wireless, this information is printed on both transmitters and receivers and is often visible on the main display. Other manufacturers may indicate elsewhere.

STEP 2: Purchase new wireless from an authorized Sennheiser dealer

Sennheiser offers a wide range of wireless mics and monitoring systems for any budget, which fully comply with current and future FCC rules and regulations. Choose from the following wireless series, in these recommended future-proof frequency ranges:

Wireless Series	Recommended Frequency Ranges
XS Wireless	A
XS Wireless Digital	
evolution Wireless G4	A1, A, G
AVX and SpeechLine Digital Wireless	1.9 GHz
2000 Series	Aw
3000 / 5000 Series	L
Digital 6000	A1 - A4
